OWASP Top 10 for Large Language Model Applications

Main | Example

About This Repository

This is the repository for the **OWASP Top 10 for Large Language Model Applications**. However, this project has now grown into the comprehensive **OWASP GenAI Security Project** - a global initiative that encompasses multiple security initiatives beyond just the Top 10 list.

OWASP GenAI Security Project

The OWASP GenAI Security Project is a global, open-source initiative dedicated to identifying, mitigating, and documenting security and safety risks associated with generative AI technologies, including large language models (LLMs), agentic AI systems, and AI-driven applications. Our mission is to empower organizations, security professionals, AI practitioners, and policymakers with comprehensive, actionable guidance and tools to ensure the secure development, deployment, and governance of generative AI systems.

Latest Top 10 for LLM Applications

The OWASP Top 10 for Large Language Model Applications continues to be a core component of our work identifying the most critical security vulnerabilities in LLM applications.

The OWASP® Foundation works to improve the security of software through its community-led open source software projects, hundreds of chapters worldwide, tens of thousands of members, and by hosting local and global conferences.

Project Background and Growth

The project has evolved significantly since its inception. From a small group of security professionals addressing an urgent security gap in 2023, it has grown into a global community with over 600 contributing experts from more than 18 countries and nearly 8,000 active community members.

Get Involved

Contribute to the Project

We welcome all expert ideas, contributions, suggestions, and remarks from security professionals, researchers, developers, and anyone passionate about AI security.

Learn how to contribute: https://genai.owasp.org/contribute/

Join Our Meetings

Participate in our bi-weekly sync meetings and stay connected with the community.

Meeting information: https://genai.owasp.org/meetings/

Connect with the Community

- Join our working group channel on the OWASP Slack - sign up and join us on the `#project-top10-for-llm` channel
- Follow our project LinkedIn page
- Subscribe to our newsletter for periodic updates

Project Support

We are a not-for-profit, open-source, community-driven project. If you are interested in supporting the project with resources or becoming a sponsor to help us sustain community efforts and offset operational and outreach costs, visit the Sponsor Section on our website.

Thank you to our current Sponsors and Supporters
